jBilling

The
Open Source
Enterprise
Billing System

Installation Instructions

1. Download and install Java `(http://java.com/en/download)`. All you need is the Runtime Environment (JRE).

2. Download jBilling and unzip jBilling.

   ```
   Make sure you download the binary package, not the source. The source has the
   suffix '-src'. For example, download this jbilling-1_0_0.zip, not this jbilling-
   1_0_0-src.zip.

   Example: unzip the package in c:\applications
   ```

3. Startup jBilling by executing: bin/startup.sh on Linux or bin/startup.bat on Windows

   ```
   Example:
   cd c:\applications\jbilling-community-3.0-rc2
   startup.bat
   Mac and Linux users do: "chmod +x bin/*.sh" before the startup
   ```

4. Login to the example 'Trend' company, or create your own.

   ```
   To create you own: Point your browser to http://localhost:8080/jbilling/signup
   For the example company 'Trend': Point your browser to http://localhost:8080/jbilling and login
   with the user 'admin' password 123qwe
   ```

5. Follow the Getting Started guide: `http://www.jbilling.com/documentation/getting-started-with-jbilling`
